

EXPLODING STICK BOMB!

You'll need a pile of giant craft sticks. We're giving you 20 to start with but you can make your chain even longer if you have more sticks!

Instructions:

- **Step #1:** Cross two sticks into an "x" shape like in the picture. Slant the sticks so that there are two obtuse and two acute angles. The stick on top will be stick 1 and the stick on bottom will be stick 2, see picture #1 for note.
- **Step #2:** Add stick 3 by tucking one end under the end of Stick 2. The new stick should go over Stick 1.
- **Step #3:** Add another stick by tucking its end under Stick 2 and letting the rest lay over Stick 3.
- **Step #4:** Continue adding sticks like the pictures until you've reached the desired length. Just remember that patience will pay off and the longer the stick bomb you make the longer explosion show you'll have.
