

MAKE A TEXTURE BOOK!

Why make a texture book?

A texture book is a fun way to explore the world around. Practice fine motor skills by using a crayon, use your creativity to make interesting designs, and test your hypothesis of what objects would make an interesting texture on paper!

How do I add textures to my book?

Choose a page in your texture book. Find a surface or object that has an interesting texture and place your chosen page right on top of it. You might need to fold all the other pages back. Then rub your crayon over the page until something appears. It's best to use the side of the point of your crayon and apply light pressure.

Texture ideas:

- Leaves or other nature objects
- Bumpy toys like LEGOs
- The bottom of your shoe!
- Tiles on a floor
